

## **Brooker Highway Junction Upgrades: Elwick, Goodwood and Howard Roads**

### **Notification of Works**

To the Resident

Hazell Bros has now started works on the Brooker Highway Junction Upgrades project.

Currently, we are building a new entrance to Timsbury Road from Howard Road (opposite the entrance to Bunnings). The old entrance to Timsbury Road from the Howard Road roundabout will then be closed.

From **Tuesday, 9<sup>th</sup> February 2016, Stage 1 works will commence on the Brooker Highway itself**. Most of the roadworks will be on land next to the highway and will not directly affect traffic. However, there will be some changes for traffic at the Howard Road roundabout.

The works include:

- Making the Howard Road roundabout smaller to allow space for roadworks on the river side of the highway
- Joining the existing highway with the smaller roundabout

From **March 2016, main works will commence at the Elwick and Goodwood Road intersections**. Most of the roadworks will be on land next to Elwick and Goodwood Roads and will not directly affect traffic.

The works include:

- Constructing new Elwick and Goodwood Road sections to join these roads together
- Building a new carpark at Elwick Racecourse
- Constructing a new section of Renfrew Road

These road works will create some delays for drivers and will have an impact on some residents during construction. All road works will be carefully planned and monitored to make sure delays are minimised and any impacts on residents are carefully managed.

Updates on road works will be provided to residents, businesses & facilities as well as motorists and the general public. These updates will be about new works, changes to traffic conditions, bus routes and bus stops, and changes to pedestrian access.

**Hazell Bros Group Pty Ltd**
